

Providers:

We understand that there has been significant requests for PPE and other medical supplies/equipment. Previously you may have been told to go through your Parish EOP (Emergency Operations Center) or use the app, ReadyOps – effectively immediately, please discontinue using those avenues.

In an effort to streamline that process, we have developed the following protocols for you to seek the PPE/supplies that you need:

1. To the extent possible, please continue to use the vendor/supply chain you would normally to request such supplies.
2. We are keeping a list of unique providers (as they become made known to us) listed below. You may be able to receive supplies more quickly by purchasing from them directly.
3. You can call the State Supply Hotline at 225-325-5900 to be put on our list as supplies become available. This phone line is available seven days a week from 8:00 a.m. to 5:00 p.m. CST.

This guidance is for NON-government entities.

Additionally, this is not a guarantee that you will receive PPE – we are prioritizing supplies that go out based on need. You may receive some of your request in an effort to assist as best we can. We understand there are shortages of supplies everywhere across the state and the U.S., so please be patient as we look to distribute our limited resources the best way we can.

Resource List

The following companies have been identified as PPE suppliers:
